

The Phone-Only AI Income Starter Pack

Start earning with free AI tools — using nothing but the phone in your hand.

No PC. No graphics card. No coding. No subscriptions.

20 money prompts · 3 same-day wins · the \$10 → \$100 plan

This pack is for the person who was told they needed an expensive computer and years of study to use the good tools. You don't. Every tool named here is **free and open-source**, ranked #1 in its category by GrandGitMaster's automated scoring, and usable from a browser on your phone. Pick one win, follow the steps, get your first sale. Then reinvest and repeat.

First: how to use this pack (2 minutes)

1. **Pick ONE thing below.** Not five. One. Momentum beats planning.
2. **Copy the prompt** into any free AI (open-webui, or a free chat like the ones in the "free AI" list at the end).
3. **Fill in the [brackets]** with your details.
4. **Deliver the result** and get paid. Then do it again — faster each time.

Three same-day wins (aim: your first \$10 today)

Win #1 — Sell a set of social-media captions (\$5–10)

Small businesses and creators hate writing captions. You give them a week's worth in 5 minutes.

Act as a social media copywriter. Write 15 scroll-stopping Instagram captions for a [type of business, e.g. coffee shop] in [city]. Mix promotional, behind-the-scenes, and engagement-question styles. Each under 150 characters, with 3 relevant hashtags. Friendly, punchy tone.

Sell on: Fiverr ("I'll write 15 captions for your business"), local Facebook groups, or DM 10 small businesses near you.

Win #2 — Flip a resume / LinkedIn rewrite (\$5–15)

Everyone job-hunting will pay a few dollars to sound sharper.

You are an expert resume writer. Rewrite the following work experience to be results-driven, using strong action verbs and measurable impact. Keep it truthful, ATS-friendly, and concise. Here is the text: [paste their resume text]

Sell on: Fiverr, Reddit r/forhire, your own social circle. Charge \$5 to start, raise to \$15 once you have a review.

Win #3 — Sell this very pack (or your own) (\$7 each, unlimited)

The digital-product move: make once, sell forever. This is the engine of the \$10 → \$100 plan.

How: Upload a helpful guide (like this one, or one you make with the prompts below) to Gumroad — free to list. Share the link. Every sale is pure profit.

20 money prompts (organized by what they make you)

Each one: paste into a free AI, fill the [brackets], sell the output. Suggested prices are starter prices — raise them once you have a review or two.

The \$10 → \$100 plan (compounding, not luck)

The whole idea: a digital product costs \$0 to make and \$0 to copy. So once you make your first \$10, you don't spend it on living — you **reinvest every dollar into more selling power** until \$100 comes on its own.

- \$0 → \$10 — Make one thing, sell it 1–2 times.** Use Win #1 or #2 above, or upload a mini-ebook (prompt #18) to Gumroad. Share the link in 3 places you already hang out (a group chat, a subreddit, your story). Goal: one or two sales.
- \$10 → \$30 — Reinvest into a SECOND product + a review.** Use your first \$10 to buy one small promoted post OR a \$5 Fiverr gig image for a better cover. Make a second product from the prompts. Two products = double the shots on goal.
- \$30 → \$60 — Bundle & raise prices.** Combine your products into a "bundle" priced higher than the parts. Ask every buyer for a testimonial — social proof lets you double your price honestly.
- \$60 → \$100 — Put \$20–30 into cheap, targeted promotion.** A small boosted post or a shoutout in a niche group, pointing at your best-selling product. At this point each sale funds the next ad. That loop is the business.

Reality check: this is effort, not magic. Speed depends on your niche and how many people you show it to. The math only works if you actually **ship and share** — a product nobody sees earns \$0. But the cost to try is genuinely zero.
